## Features

- Optimized and Designed for Microsoft® Windows® 2000
- 1 Year Warranty
- 16 Relay Inputs for Alarm Control
- 16 Digital Control Outputs on Alarm Activation
- Supports Multiple Simultaneous Remote Connections
- PAN / TILT / ZOOM Controls
- Supports Simultaneous Video Recording and Search Playback
- Create Video Indexes for Easy Searching
- Multiple Levels of Security Access
- Remote System Operation & Configuration
- 16 Cameras per DVR Unit
- High Performance Rackmount Case
- 16 Channels Looping Output
- Unlimited Storage Potential
- Supports Watermarking & Digital Signature Support
- Continuous, Motion Detection, Alarm, Pre-Alarm, and Scheduled Recording Modes
- Hardware Watchdog
- 720x480, 720x240, 360x240 Recording Resolution (NTSC)

## DVR Rackmount Unit

Digital Watchdog® state-of-the-art High Definition Digital Recorders are equipped with an Intel® Pentium 4 Processor, 56K Hardware Modem, 10/100 Network Interface Card (NIC), 256 MB of System Memory (RIMM), 32 MB Video Card, CDR-W Recordable CD Drive, 3.5" Floppy Drive, Sound Card, and a standard 80 GB Video Storage Drive. Housed in a high performance and versatile Rack Mount case, storage of multiple DVR's for enterprise applications is easier than ever.

## DVR Server Software

The Digital Watchdog 9000 Series come pre-configured for fast and seamless integration within your existing IT infrastructure. Designed around Microsoft Windows 2000, the server software offers unparalleled stability, security, and ease of use. Accordingly, your security investment has never been easier to maintain. Multiple users may simultaneously connect through any network or dial-up connection for instantaneous live viewing, digital search, and off-site video storage. This powerful software enables users to establish recording schedules, create motion detection zones, use PTZ controls, and configure alarm inputs and outputs for each of the system's cameras. With the latest advancements in the DVR Server Software, searching and indexing your video archive has never been easier. Video can now be found, viewed, and exported in a number of file formats with just a few clicks.

## DVR Remote Software

Connecting remotely to the 9000 Series DVR has never been easier. The DVR Remote Software allows multiple remote users to view, search, index, and backup video through any network or dial-up connection. Remote users may also be granted system configuration privileges based upon a multilevel password hierarchy. If enabled, the DVR is also capable of instantaneously transmitting live video and notification to remote users upon motion detection and alarm. Additionally, the remote software has been engineered to operate flawlessly on any Microsoft platform.

Cameras	8/16/32
Operating System	Running on <b>Microsoft®</b> Windows® 2000, Digital Watchdog DVR's Offer the Security & Stability You Demand
Viewing Rate	Real Time Viewing (480 FPS)
Recording Rate	240 FPS
Digital Control Output	16
Resolution	(NTSC - 720x480, 720x240, 360x240) (PAL - 720x576, 720x288, 360x288)
Image Compression	2~3 Kbytes Per Frame - Proprietary DEEP Format (DEnsity EXchange Protocol)
Storage (Size)	80 / 120 / 240 / 360-960 GB Standard / Unlimited Storage Potential
Sensor Input	16
Max FPS Per Channel	30 Frames Per Second (FPS)
