High Resolution Black IR LED  
Vandal-Resistant Dome Camera

## SIR-4260V

The SIR-4260V is a high resolution IR LED camera that can capture images within 30 meters in extremely low or no lighting using its built-in black IR LED lamps. In addition, it boasts excellent performance in monitoring inside factories, warehouses and stores. The rugged dome exterior sports superior physical shock resistance against accidents and vandals.

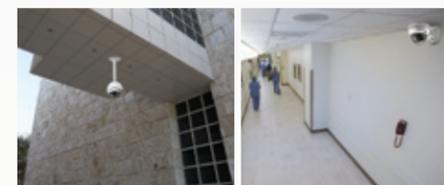

### Superb Color Image Quality at 600TV Lines Resolution!

**600TVL** Thanks to the Samsung Techwin DSP W-V chipset, the SIR-4260V boasts stable and precise image processing, delivering high-quality images with a color resolution of 600TV lines.

### Easier to Install

**Easy Installation** With the use of the same accessories as the existing vandal-resistant dome cameras, the SIR-4260V is easier to install.

### Clear Images of Close Objects in IR Mode

**IR MODE** In IR mode, the SIR-4260V suppresses image blur with an IR LED lamp in B/W mode, ensuring clear images when shooting close objects.

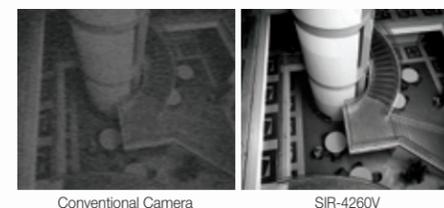

### 0Lux, No Additional Illumination required

**0Lux** With built-in high performance black IR LEDs, which are up to four times brighter than normal ones, the SIR-4260V can capture even tiny movements up to 30 meters in complete darkness of 0Lux.

### SSNRIII (Samsung Super Noise Reduction)

**SSNR III** The SIR-4260V ensures clear and sharp images in low lighting by eliminating "image noise" with its high performance W-V DSP chips.

### SSDR (Samsung Super Dynamic Range)

**SSDR** Under backlit conditions, where there is a clear distinction between bright and dark areas, the SIR-4260V selectively brightens dark sections, ensuring virtually homogeneous brightness across the image.

### Samsung Techwin's Proprietary Technology **WV** DSP for High Resolution Monitoring

W-V, an embodiment of Samsung Techwin's commitment to technological development, is a fifth-generation DSP chipset that enables high resolution of 600TV lines. Samsung Techwin packs quite a bit of technology into the small chip to deliver unmatched cost-effectiveness. The chip features SSNRIII "image noise" elimination using upgraded 2D/3D filtering to ensure clear images in the darkness, day & night, SSDR, HLC highlight backlight compensation, image stabilization, multiple language OSD and other high-end features.

### Various Digital Features

- Backlight Compensation (HLC, SSDR)**  
: The camera displays clear images captured under backlit conditions.
- Multiple Language OSD**  
: You can select a language you want, such as English, French, Spanish and Italian.
- Motion Detection**  
: The camera detects moving objects without exterior sensors.
- Supporting COAX Communications**  
: Coaxial control enables OSD control.
- Versatile Varifocal Lens**  
: The built-in 3.6X, 2.8-to-10-millimeter varifocal lens enables flexible adjustments of viewing angles.
